

October 14th, 2022**Subject: Recommendation letter**

To whom it may concern.

I am Ing. Pavel Ruzicka, PhD. - Head of the CFD Department of the Evektor, spol. s r.o. , Kunovice, Czech Republic. It is my pleasure to write this recommendation letter in favour of Mr. Mikołaj Dzikowski.

I have spent with Mikołaj last year as his coach and project leader. During this time I watched his progress and increase of his skills. As aircraft aerodynamicist he had to deal with tasks connected with development and preparation of certification of the new airplane. He was able to go practically through all main stages of the airplane development from the aerodynamic point of view – aerodynamic load of the main lifting surfaces, stability and control analyses, flight tests principal and evaluation – all for FAR/CS 23 category airplanes. During this process he became familiar with CFD analyses as well as analytic analyses using in-house codes.

Of course he would need more praxis and deeper view into more precious and detailed analyses, but he became familiar with process and bases of work and obtained good foundations of approach how to solve common problems. This he can apply and develop in his further professional growth.

Regarding other skills, he is cooperative, hardworking and reliable team-member, in work careful and always keen on obtaining new information and knowledge.

I can recommend him with a clear conscience for cooperation or obtaining job in any engineering team.

Ing. Pavel Růžicka, PhD
Head of the CFD Department
